

rev::Object

rev::Serializable

rev::CameraController

```
classDiagram
    rev::CameraController --> rev::Object
    rev::CameraController --> rev::Serializable
```

The diagram illustrates a class hierarchy where `rev::CameraController` is a base class for both `rev::Object` and `rev::Serializable`. This is represented by two arrows originating from the bottom box and pointing upwards to the top-left and top-right boxes respectively.
